

Auto Burn Stop

Auto Burn Stop

Auto Burn Stop is an automated vehicle fire detection and suppression system. It uses accurate sensors and pipes installed in and around the engine to detect and put out fires instantly. Having GSM/GPRS notification and smart fire analysis, it minimizes damage before the fire gets unmanageable. Compatible with all vehicle models, this system offers safer driving by eliminating the use of manual intervention in emergency situations.

Features

www.autoburn-s.com

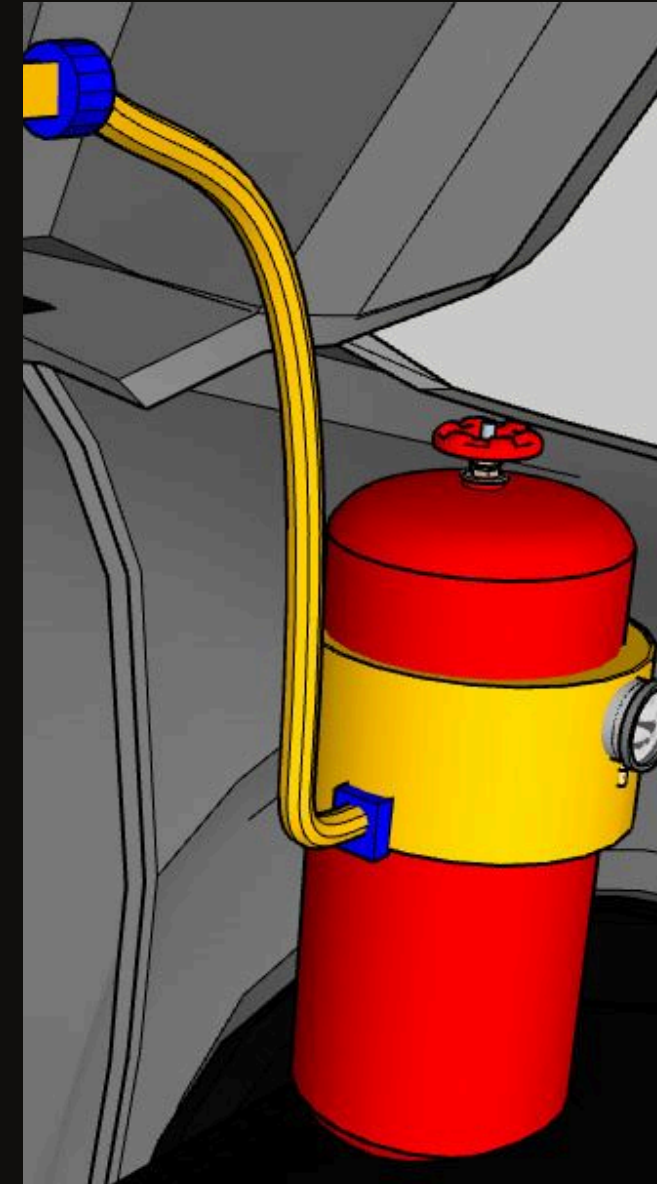

- Automated fire detection & suppression
- Engine compartment pipe network
- Smart fire intensity analysis
- GSM/GPRS emergency alerts
- Retrofittable to current vehicles

Advantages

- **Instant fire response:** Identifies and extinguishes flames within seconds, preventing catastrophic damage.
- **No human intervention needed:** Automatically deployed system even if driver unaware of fire.
- **Emergency alerts in real-time:** Informs drivers and safety centers via GSM/GPRS.
- **Works on any vehicle:** Compatible with cars, trucks, and fleets with minimal modifications.
- **Precision fire control:** Analyzes fire class and uses the correct extinguishing agent efficiently.

Applications

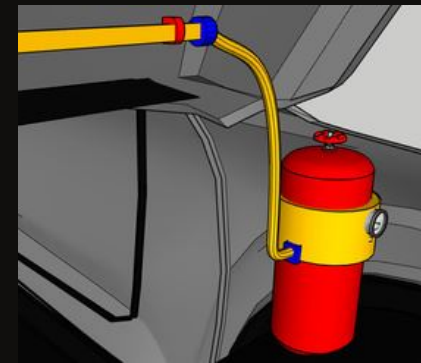

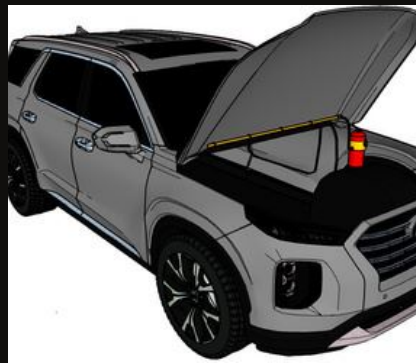

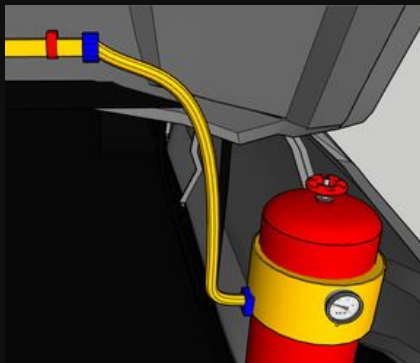

Passenger cars: Protects personal vehicles from electrical or fuel-powered engine fires.

Commercial fleets: Offers protection for delivery trucks, taxis, and ride-sharing vehicles.

Emergency service vehicles: Fire trucks and ambulances receive additional fire protection.

Industrial transport: Heavy machinery and logistics trucks reduce fire-related downtime.

Public transport: Shuttle and bus add passenger safety with automated suppression.

Target Markets

Automotive brands:

OEM addition to new models of cars with added safety features.

Insurance providers:

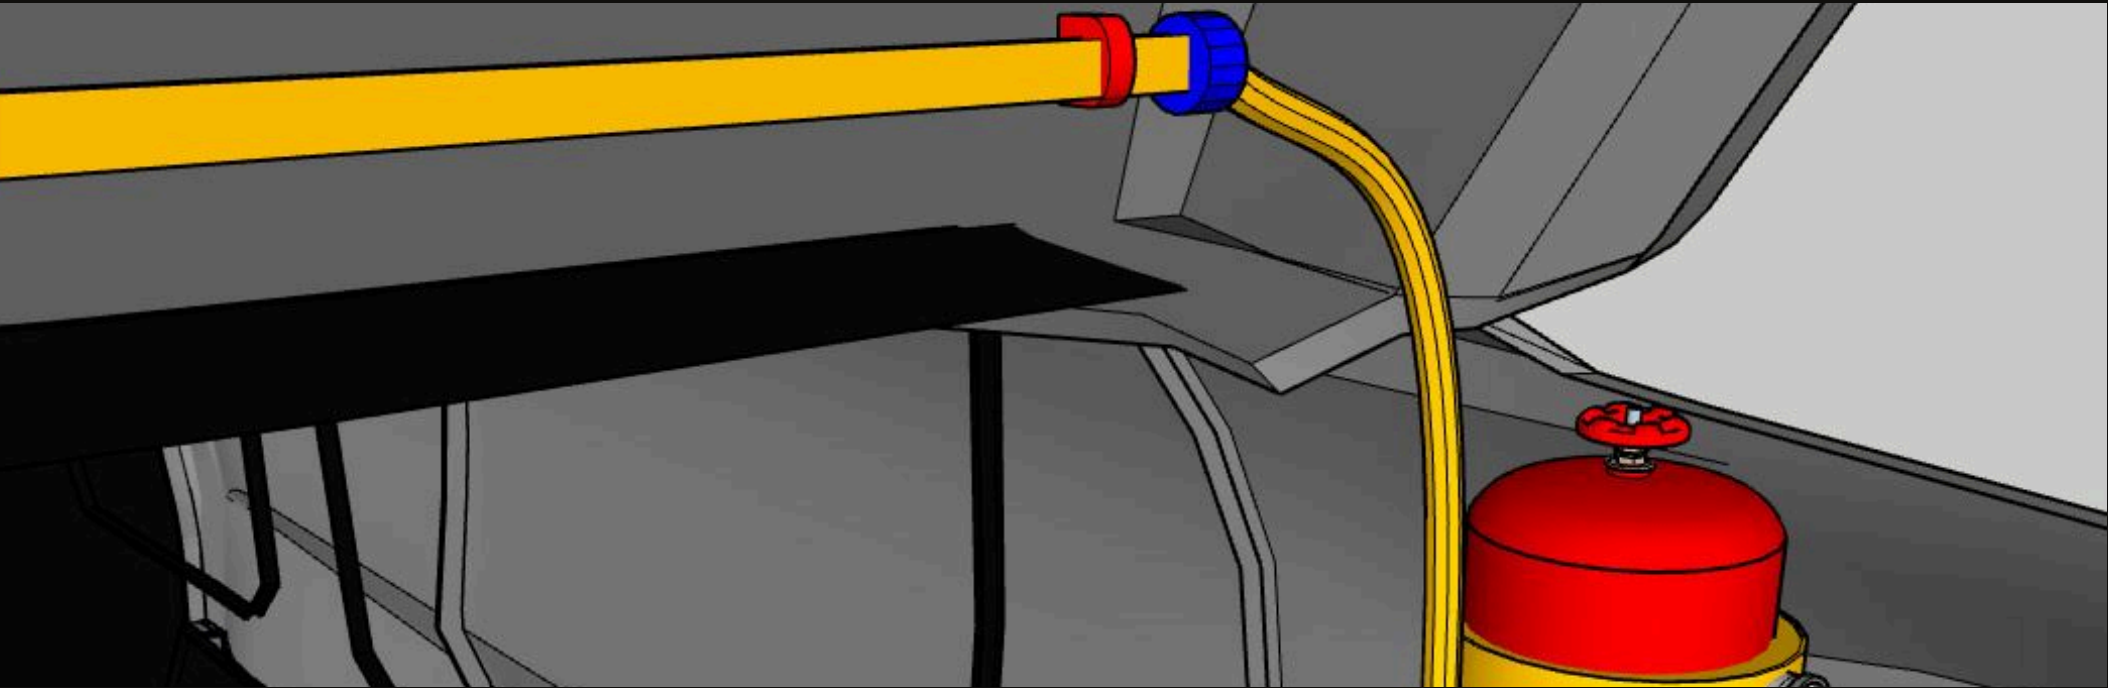

Partner and offer policyholder discounts using fire prevention systems.

Government & municipal transport:

Municipal transport authorities prioritize passenger and asset security.

Users of high-performance cars:

Sports and luxury car users invest in state-of-the-art fire protection.
